### Description

Chimera Triolet Kits are the perfect all-in-package with everything you need to get lighting! Complete with a Triolet, Small Lightbank, Fabric Grid, and folding aluminum stand, these kits give you a great setup for interview or product lighting.

The included Video Pro Small is perfect as an interview key light, at 24x32" with a Silver interior. For additional light control, the included 40-degree fabric grid is perfect for preventing unwanted spill.

Chimera Triolet is the ultimate multi-tool lighting fixture. Designed as a compact, versatile, continuous lighting problem-solver, the Triolet features all-metal construction and an attached cord with inline switch.

Compatible with Mogul (E39 / E40) and Medium (E26/E27) bulbs, the Triolet's simplicity is its advantage, offering compatibility with Tungsten, Fluorescent, or LED bulbs up to 1,000W. The included speed ring support Chimera Video Pro, OctaPlus, and Lantern Lightbanks. Its fully-exposed bulb design offers use either in a lightbank or as a practical fixture alternative. For more information on what bulbs you can use in the Triolet, **check out our handy help article on the Chasing Light forums!** (<http://chimeralighting.com/forum/qa-chimera-lighting-fixtures/what-bulbs-can-i-put-into-my-triolet/>)
