

Gaffair Series | Airstar Film & Television Lighting

The Gaffair series was developed when pros asked for the same advantages of our elliptical balloon lights in a silent, helium-free package in smaller areas. The units are easy to setup, move, and strike, as well as glare-free, with a very low UV output to protect models and the only light signature is a single round shape, just like the moon or sun. Units are available from 400-4000W HMI, available with Vapor harness, and are ARRI plug compatible for use with any ballast on set.

Which Gaffair size works for you?

400-1200W

PRODUCTS	Source	Lamps	Diameter	Ship Weight	Setup Time	Max Lumen
400W	HMI	1 x 400W	2.5 feet	46lbs w/case	10 min.	33,000
